Definitely an E-Ticket

The dA Center for the Arts and SCA Project Gallery ride you into kitschy, parallel universes

By: Stacy Davies

Over on the next horizon, the SCA Project Gallery offers a different kind of daytrip or evening excursion. Curated by Bob Pece, "Earthviews" takes us on an organic outing with a wide variety of natural forms and foliage dotting our landscape.

Virginia Katz's abstract swaths of color and texture all tumultuously in motion are clearly what came before man took over this Earth and what will no doubt return after we have long since vanished—reminding us once again that no matter how important we think we are, Nature will certainly get the last laugh.

"Earthviews" at the SCA Project Gallery, 281 S. Thomas St., Unit 104, Pomona, (909) 620-5481; www.scaprojectgallery.org. Thurs-Sat, noon-4PM. Thru July 3. Open receptions for both Sat, June 12. Free.
